

Audio-CD : 'Lichtungen - Eine Einladung zur Stille'  
Piano - Improvisations

"Music is pure energy. At an elemental level, it is an event fashioned from vibrations and oscillations, an event taking place between the sound source, the field of resonance, and the human ear. When the physician and psychotherapist Rolf Verres turns into a musician and immerses himself in daydreams at his Fazioli concert grand, the result is elemental energy of this kind. He releases sounds from the resonant body of the instrument, loving them, as it were, out of the piano. Player and instrument merge into one. Sometimes we hear his breath or the work of his feet on the four pedals, the sound of the felt disengaging itself from the strings. The subtle recording communicates the entire range of these resonances. Sound in the vicinity of silence creates closeness."

Fritz Hegi
